Welcome to 4th Grade!

Happy Summer! Please be sure to enjoy every second before we start the new year. I look forward to exploring, discovering, and experimenting through all the different subjects. Getting to know all of our students and families is on the top of my list, but first, I will tell you a bit about myself.

This year, I will be your **Homeroom Teacher**, but I will also be your **Math, Science & Social Studies Teacher**. I am beyond excited, as I have been thinking about cool new things to do with all of these subjects.

We will also explore new subjects like coding, robotics, and other STEAM activities within our curriculum. Learning to work as a team within our class and thinking outside the box will be an important part of 4th grade. I like to use strategies like Cooperative Learning (working in groups), Whole Brain Teaching (how our brain works), and Integration of Technology (keeping things interesting). To learn more about our classroom this year check out our **Classroom Webpage**: [http://msreichertsclass.weebly.com/](http://msreichertsclass.weebly.com/)

For anyone who is looking for something FUN to do, I have left a **BREAKOUT Challenge** on the homepage of the class website. It is alot like an Escape the Room.

I am excited to share more about myself and eager to get to know all of our classroom teammates! On our first day of school, please bring pictures of yourself, family, and favorite to share with the class and use in our STAR project.

Your Teacher,

Ms. Reichert
