## Helpful Information Regarding Course Selection

As you begin thinking about course selection in Home Access Center (HAC), there are several pieces of information that should make the process easier for you to complete.

As you progress through Home Access Center (HAC), you will be prompted to choose courses. Only those courses that are able to be chosen by you or your student will be visible. The Course Identification sheet and the Program of Study both include a list of all courses offered at Downingtown High School. Please refer to the Program of Study while completing course selection for more detailed descriptions of each course.

In the Program of Study and Home Access Center (HAC), course numbers indicate how a class will meet. We have three types of courses:

- **Traditional courses** are those that meet face-to-face every scheduled day. Traditional courses have no letter in their course number.
- **Blended courses** are those that meet both face-to-face AND online. These courses end with a “B.”
- **Cyber courses** are those that meet only online. These courses end with a “C.”

For example, Honors English 9 is offered as a traditional course, a blended course, and as a cyber course. In HAC, you will see three options: **0011** (traditional), **0011B** (blended), and **0011C** (cyber). Be sure to choose the appropriate version of the course you or your student would like to take.

The Course Identification sheet is organized by department; each block of classes represents one department’s offerings.

- **Course** - The first column is the name of the course.
- **#** - The second column is the course number. Courses that are Honors have an “H” after the course number. Courses that are **AP** have an “AP” after the course number. Technical College High School (TCHS) course numbers now begin with a “Z”.
- **P/C** - The third column indicates the number of periods per six day cycle that a course meets. 3 indicates that the course meets every other day; 6 indicates that the course meets every day.
- **Cr.** - The fourth column indicates the number of credits that the course is worth.
- **Gr.** - This second to last column identifies which grades are able to take the course.
- **Type** - The last column identifies how the course will be offered. “T” represents traditional. “B” represents blended. “C” represents cyber.
