Indicators of Academic Growth - PVAAS

Pennsylvania Value Added Assessment System - PVAAS is a statistical analysis of Pennsylvania (PA) state assessment data, and provides Pennsylvania districts and schools with growth data to add to achievement data.

Growth:

- Measures a student's growth across time; i.e., across years
- Not related to a student's demographics
- Compares student performance to his/her own prior performance
- Critical to ensuring a student's future academic success
- By measuring students' academic achievement AND growth, schools and districts have a more comprehensive picture of their own effectiveness in raising student achievement
