Back to School – Bus Drivers – Meeting – Tuesday, August 10, 2021.

Until you get further directions, the Safety Plans are as follows:

Safety plans for bus travel:

- Masks for the driver and students are required.
- Drivers will have their masks on, covering their nose and mouth, when students are loading and unloading the bus. If it is necessary, for full vision while driving and/or for medical reasons, drivers will be able to lower their mask below the nose only when driving and all students are seated.
- Students must come onto the bus with a mask on.
- Students **will not be allowed** to ride the bus if they are not wearing a mask unless they have a medical exception.
- Buses will be sanitized for the high touch areas between runs and cleaned at night.
- Drivers will be assigning seats.
- Parents are responsible for checking students’ temperature and symptoms before going to the bus stop.
- If a child is visibly sick, the driver will put the student in the front seat of the bus, and call their dispatch, so they can call the school.
- The school is **NOT** to put a sick child onto a bus.
- Buses will be putting the windows down as much as possible to ventilate the air in the bus. Please dress your child for the cooling weather.

Parents will be given the same information, when they get their bus information.
